

CSS_GRID

INPUT CODE

```
<html>
  <head>
    <title>css grid</title>
    <style>
      h1 {
        text-align: center;
        text-decoration: underline;
        background: linear-gradient(red, rgb(187, 135, 145));
        -webkit-background-clip: text;
        color: transparent;
      }
      .parent{
        background: grey;
        display: grid;
        grid-template-columns: 200px 200px 200px;
        padding: 20px;
        gap: 20px;
        justify-content: start;
      }
      .child{
        background: yellow;
```

```
border: 1px solid black;
width: 200px;
height: 220px;
text-align: center;
box-shadow: 3px 3px 5px black;
display: flex;
flex-direction: column;
justify-content: center;
align-items: center;
padding: 10px;
font-size: 18px;
font-weight: bold;
}
.child img{
width: 200px;
height: 150px;
object-fit: contain;
margin-bottom: 10px;
}
.child:hover{
background: rgb(224, 61, 88);
color: white;
}
</style>
</head>
```

```
<body>
  <h1>CSS GRID</h1>
  <div class="parent">
    <!-- Bikes -->
    <div class="child">
      
      <span>Yamaha MT-15</span>
    </div>
    <div class="child">
      
      <span>Royal Enfield</span>
    </div>
    <div class="child">
      
      <span>KTM</span>
    </div>

    <!-- Cars -->
    <div class="child">
      
      <span>BMW</span>
    </div>
```

```
<div class="child">

  

  <span>Audi</span>

</div>

<div class="child">

  

  <span>Tesla</span>

</div>

</div>

</body>

</html>
```

OUTPUT

CSS GRID

 Yamaha MT-15	 Royal Enfield	 KTM
 BMW	 Audi	 Tesla

CONCLUSION

This project highlights the practical use of **CSS Grid** in designing a well-structured webpage layout. By applying grid properties, I was able to organize images of bikes and cars in a systematic manner, ensuring equal spacing, alignment, and visual balance. Additional CSS features such as hover effects, shadows, and text styling enhanced the overall presentation and interactivity of the webpage. Through this implementation, it is evident that CSS Grid simplifies the process of creating responsive and professional-looking layouts compared to traditional methods. The project not only demonstrates the efficiency of grid-based design but also shows how modern CSS techniques can be effectively used to present content in an engaging way.
